

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Cancellations	Cancellation Code	Two digit code used to identify a reason for a cancellation.	Free form string 01, 02, 03
Cancellations	Cancellation Code Description	A description for a reason for cancellation.	Driver Licence Returned - Other Province
Cancellations	Cancellation Effective Date	The date a cancellation becomes effective.	Date (YYYY-MM-DD) 2020-05-15
Cancellations	Cancellation Microfilm Number	A unique identifier for a microfilmed cancellation.	Free form string 090013000
Cancellations	Cancelled - Cancelled (CANL)	Cancelled - Multi-purpose flag used by various program areas.	Cancelled - Cancelled (CANL) Not Applicable
Cancellations	Cancelled - Fee not paid (CANF)	Cancelled - Fee not paid.	Cancelled - Fee not paid (CANF) Not Applicable
Cancellations	Cancelled - Fee refunded (CANR)	Cancelled - Fee refunded.	Cancelled - Fee Refunded (CANR) Not Applicable
Cancellations	Cancelled - Novice (CANN)	Cancelled - Outstanding novice class requirement.	Cancelled - Novice (CANN) Not Applicable
Cancellations	Cancelled - Outstanding Fee (CANX)	Cancelled - Outstanding fee (reinstatement or administrative monetary penalty).	Cancelled - Outstanding Fee (CANX) Not Applicable
Cancellations	Cancelled - Photo Required (CANP)	Cancelled - Outstanding photo requirement OR Cancelled - Demerit points interview OR Cancelled - Remedial measures program	Cancelled - Photo Required (CANP) Not Applicable
Cancellations	Cancelled - Test Required (CANT)	Cancelled - Failure to complete required tests satisfactorily.	Cancelled - Test Required (CANT) Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Cancellations	Driver's Licence Number	A unique 15 character identifier assigned to each driver in Ontario.	Free form 15-character alphanumeric X0915-26435-95718
Cancellations	Office Number	Location (online/kiosk/office) where a transaction was completed.	Free form numeric string 134
Cancellations	Operator ID	An operator who processed a transaction.	Alphanumeric 7
Cancellations	Record Date	The date a cancellation is recorded in the system.	Date (YYYY-MM-DD) 2020-09-04
Carrier Client	Address Description	Client's address description.	Residential Mailing
Carrier Client	Address Validated	Indication that an address has been validated by a postal code.	Flag Yes No
Carrier Client	City	City.	Free form string BRAMPTON
Carrier Client	Client Role	Identifies if the client role is Driver, Registrant, Ontario Photo Card holder, etc.,	Driver Registrant OPC Carrier
Carrier Client	Client Type	The type of client represented in the record. One of three types - Individual, Corporation or Multi-Party.	Individual Corporation Multi-Party
Carrier Client	Client-DL jurisdiction	Jurisdiction of a driver's licence (province or state).	2-digit alpha code
Carrier Client	Commercial Vehicle Operators Registration Number	A unique identifier issued to all commercial vehicle operators.	9-digit numeric 176979983

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Client	Country	Client's address country.	Canada Non-Canada
Carrier Client	Current Address Effective Date	The business date an address change effectively takes place.	Date (YYYY-MM-DD) 2020-05-15
Carrier Client	Date of Birth	Date of birth of an individual client.	Date (YYYY-MM-DD) 1980-02-15
Carrier Client	Deceased	Indicates if an individual is deceased or reported dead (DEAD).	Flag: Reported Deceased Not Applicable
Carrier Client	Driver's Licence Number	A unique identifier assigned to each driver. In Ontario, this is a unique 15 character identifier.	15-character alphanumeric string X09152643595718
Carrier Client	Fax Number	The fax number of a client.	Numeric 5551234567
Carrier Client	First Name	The first name of an individual client.	Free form string JANE
Carrier Client	Formatted Province	Formatted description of a province code and description.	List: ON - Ontario
Carrier Client	FSA	Forward Sortation Area is the first three characters of a postal code.	Free form string M3R
Carrier Client	Gender	Drivers who wish not to self identify as male or female, and wish to remain gender neutral.	Gender Neutral Male Female
Carrier Client	Height in CM	The driver's height in centimeters.	Free form numeric 160
Carrier Client	Language	The language a client would prefer to use when interacting and/or communicating with the ministry.	English French

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Client	Last Name	The last name of an individual client.	Free form string SINGH
Carrier Client	Legal Name	The legal name of a corporation client as confirmed by Articles of Incorporation or registration documents.	Free form string 34095 Ontario Inc.
Carrier Client	Method of Communication	The method in which a client wishes to receive communication from the Ministry of Transportation.	Email Phone Fax Mail
Carrier Client	Middle Name	The middle name of an individual client.	Free form string MARY
Carrier Client	Mobile Number	The mobile number of a client.	Numeric 5551234567
Carrier Client	Motor Vehicle Inspection Station Indication	Indication of whether a client has a Motor Vehicle Inspection Station.	Flag: Yes No
Carrier Client	Multi Party Relationship 1	The linking of two or more client records (ie. a joint partnership). The joint relationship will have its own Registrant Identification Number.	Numeric 175921702
Carrier Client	Multi Party Relationship 2	The linking of two or more client records (ie. a joint partnership). The joint relationship will have its own Registrant Identification Number.	Numeric 175921702

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Client	Multi-Party Name	The names of the clients in a multi-party relationship.	Free form string Jaspreet and Chris Trucking Inc.
Carrier Client	Municipality	Municipality.	Look up table AJAX
Carrier Client	Name	Last Name, First Name, Middle Name.	Free form string DOE, JANE, CHRISTINE
Carrier Client	Old First Name	First name.	Free form string JAVIN
Carrier Client	Old Last Name	Last name.	Free form string JANUZ
Carrier Client	Old Middle Name	Middle name.	Free form string SALLY
Carrier Client	Ontario Photo Card (OPC) Person ID	A system generated unique ID for each driver and/or Ontario Photo Card (OPC) holder.	Free form numeric 101280766
Carrier Client	Operating As	Operating name or trade name of a client as confirmed by the Master Business Licence document.	Free form string XTL Transport
Carrier Client	Phone Number	The phone number of a client.	Numeric 5551234567
Carrier Client	Postal Code/Zip Code	Client's postal code.	Free form string M4P 1G8
Carrier Client	Prepaid Amount	Amount in dollars a client has paid on their account in advance of incurring expenses.	Numeric 3500
Carrier Client	Province	Indicates if the address is in Ontario or not in Ontario.	Ontario Non-Ontario
Carrier Client	Registrant Identification Number (RIN)	A unique identifier for the registrant of a vehicle or plate.	9-digit numeric 654322354

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Client	RIN Merge Status	Registration Identification Number (RIN) Merge Status.	Flag Y - Merged No Merge
Carrier Client	Sex	The gender of an individual.	M F
Carrier Client	Stored Credit	Refund balance in dollars owed to a client.	Numeric 150
Carrier Client	Street Address	Client's street address.	Free form string 55 EGLINTON STREET WEST
Carrier Events	Commercial Vehicle Operators Registration (CVOR) Number	A unique id issued to all commercial vehicle operators.	9 digit numeric number 175921702
Carrier Events	Event Collision Accident Class	The class that identifies the severity of the collision on the Motor Vehicles Accident report.	01 - Fatality 02 - Injury 03 - Property Damage
Carrier Events	Event Collision Charges Laid	Indicates if charges under the Highway Traffic Act were laid at the time of the collision.	Yes No
Carrier Events	Event Collision Driver Action	Indicates the apparent driver action taken immediately prior to the collision. Does not apply to evasive action taken by driver to avoid the collision.	2-digit numeric
Carrier Events	Event Collision Driver Charged	Indicate whether driver was charged for the collision.	Yes No

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Collision Driver Condition	Indicates the condition of the driver at the time of the collision. If more than 1 condition applies, the condition most relevant to the collision is entered.	1-digit numeric
Carrier Events	Event Collision Driver Condition Description	Description the condition of the driver at the time of the collision. If more than 1 condition applies, the condition most relevant to the collision is entered.	Normal Had Been Drinking Ability Impaired, Alcohol Ability Impaired, Drugs Fatigue
Carrier Events	Event Collision Driver Convicted	Indicate whether driver was convicted for the collision.	Yes No
Carrier Events	Event Collision Impropiety	Indicates if the carrier was determined to have impropiety in the collision reported.	Y N
Carrier Events	Event Collision Incident Time	The time of day that the collision occurred.	HH:MM AM/PM
Carrier Events	Event Collision Points	The number of commercial vehicle operator registration severity points resulting from impropiety and related injuries.	numeric whole number
Carrier Events	Event Collision Reporting Centre	Indicates if the collision was reported at a police collision reporting centre.	Yes No

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Collision Vehicle Condition	Indicates the condition of the vehicle and any obvious defect which may have affected the operation of the vehicle and contributed to the cause of the collision.	2-digit numeric
Carrier Events	Event Collision Vehicle Condition Description	Description of the condition of the vehicle and any obvious defect which may have affected the operation of the vehicle and contributed to the cause of the collision.	No Apparent Defect Service Breaks Defective Steering Defective Tire Puncture or BlowOut
Carrier Events	Event Collision Vehicle Manoeuvre	Indicates the manoeuvring of the vehicle prior to impact or the driver's realization that impact might occur. It does not include any vehicle manoeuvre taken to avoid a possible collision.	2-digit numeric
Carrier Events	Event Collision Vehicle Manoeuvre Description	Description of the manoeuvring of the vehicle prior to impact or the driver's realization that impact might occur.	Going Ahead Slowing or Stopping Overtaking Turning Left Turning Right

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Conviction Alternate Group	Indicates the category of the conviction such as driver, vehicle, load or other convictions.	Driver related Vehicle related Load related Other
Carrier Events	Event Conviction Carrier Category	Indicates a code related to a possible reduction to commercial vehicle operator registration points based on speed or weight.	Overweight conviction Speeding
Carrier Events	Event Conviction Date	Date of conviction.	YYYY-MM-DD
Carrier Events	Event Conviction Incident Time	The time the offence occurred.	HH:MM AM/PM 7:32 AM, 8:28 PM
Carrier Events	Event Conviction Offence Code	Identifies the legislation or regulation and section of the offence.	alphanumeric HTA 128
Carrier Events	Event Conviction Overweight in KG	The amount overweight in kilograms in excess of allowable weight that the defendant was convicted of a violation.	numeric
Carrier Events	Event Conviction Points	Indicates the number of commercial vehicle operator registration severity points assigned to the conviction.	Numeric whole number
Carrier Events	Event Conviction Safety Code	Indicates whether the conviction is safety related or administrative.	S,A
Carrier Events	Event Conviction Speed	Vehicle Speed	Free form numeric

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Conviction Speed Limit	Road speed limit.	Free form numeric
Carrier Events	Event Conviction Type	Indicates the specific category of the offence such as document, driver, vehicle, load, overweight, and others.	Document Driver Vehicle Load
Carrier Events	Event Conviction Vehicle Identification Number (VIN)	Vehicle Identification Number is a serial number assigned for each vehicle.	17-character alphanumeric string 1HGBH41JXMN109186
Carrier Events	Event Driver Jurisdiction	Identifies the geographic jurisdiction of the driver involved in the event.	CAAB, CABC, CAON
Carrier Events	Event Incident Date	Identifies the date on which the event took place.	YYYY-MM-DD
Carrier Events	Event Inspection Out of Service Defect	Identifies if a defect resulted in a vehicle being placed out of service as a result of commercial vehicle safety alliance inspection.	Y N
Carrier Events	Event Inspection Charges Laid	Indicates if charges were laid at the time of the commercial vehicle inspection.	Y N
Carrier Events	Event Inspection Co Driver	Indicates whether a co driver was present at the time of commercial vehicle inspection.	Y N

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Inspection Defect Category	Identifies the general category of a defect found during a commercial vehicle safety alliance inspection.	AIR BRAKES LINING/PADS
Carrier Events	Event Inspection Defect Code	Identifies the specific defect found at time of commercial vehicle safety alliance inspection.	10153000
Carrier Events	Event Inspection Defect Information Vehicle Number	Identifies the position of the vehicle within the configuration being inspected (eg. power unit #1, semi trailer #2) as a result of commercial vehicle safety alliance inspection.	numeric whole number
Carrier Events	Event Inspection Driver Points	Severity points assigned in the event of driver defects at time of commercial vehicle inspection.	numeric whole number
Carrier Events	Event Inspection Finish Time	The time of day that the commercial vehicle inspection completed.	HH:MM AM/PM
Carrier Events	Event Inspection Impounded	Indicates if a commercial vehicle was impounded as a result of the inspection.	Y N

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Inspection Level	Indicates the level of commercial vehicle safety alliance (CVSA) inspection that was conducted.	1 - North American Standard 2 - Walk-around/Driver Vehicle 3 - Driver only 4 - Special 5 - Vehicle only
Carrier Events	Event Inspection Make	The make of the vehicle.	4-character string TESL
Carrier Events	Event Inspection More Defects Indicator	indicates whether a specific vehicle had other defects at the time of commercial vehicle safety alliance inspection.	Y N
Carrier Events	Event Inspection Number of Defects	Indicates the total number of defects that were present at the time of the vehicle inspection.	numeric whole number
Carrier Events	Event Inspection Number of Out of Service Defects	Indicates the total number of out of service defects that were present at the time of the vehicle inspection.	numeric whole number
Carrier Events	Event Inspection Number of Out of Service Defects Category	Indicates the total number of defect categories that consisted of out of service defects as a result of commercial vehicle safety alliance inspection.	numeric whole number
Carrier Events	Event Inspection Number of Units	Indicates the total number of power units and trailers that were inspected.	numeric whole number

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Inspection Out of Service Defect Indicator	indicates whether a specific vehicle had of out of service defects at the time of commercial vehicle safety alliance inspection.	Y N
Carrier Events	Event Inspection Plate Number	The unique identifier printed on the licence plate.	10-character string BNSP715
Carrier Events	Event Inspection Start Time	The time of day that the commercial vehicle inspection began.	HH:MM AM/PM
Carrier Events	Event Inspection United States Department of Transportation Number	Identification number assigned by the United States department of transportation to carriers based in the United States.	alphanumeric
Carrier Events	Event Inspection Vehicle Identification Number (VIN)	Vehicle Identification Number is a serial number assigned for each vehicle.	17-character alphanumeric string 1HGBH41JXMN109186
Carrier Events	Event Inspection Vehicle Number	Identifies the position of the vehicle within the configuration being inspected (eg. power unit #1, semi trailer #2) as a result of commercial vehicle safety alliance inspection.	numeric whole number
Carrier Events	Event Inspection Vehicle Number of Defects	Indicates the total number of defects on a specific vehicle at the time of the commercial vehicle safety alliance inspection.	numeric whole number

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Inspection Vehicle Points	Severity points assigned in the event of vehicle defects at time of commercial vehicle inspection.	numeric whole number
Carrier Events	Event Inspection Vehicle Type	Identifies the type of vehicle that was inspected as a result of commercial vehicle safety alliance inspection.	free text field
Carrier Events	Event Jurisdiction	Identifies the geographic jurisdiction in which the event took place.	CAON, CAMB
Carrier Events	Event Location	Identifies where the collision conviction or inspection took place by numeric code or description.	Free form text
Carrier Events	Event Out of Province Operator Jurisdiction	Operator jurisdiction	CAAB, CABC, CAON
Carrier Events	Event Out of Province Operator Name	The legal name of the Corporate client	Free form text
Carrier Events	Event Received Date	The date the event was received from the source system.	YYYY-MM-DD
Carrier Events	Event Recorded Date	The date that the event is entered into the system.	YYYY-MM-DD
Carrier Events	Event Status	Identifies the status of the event.	In Progress Reject Resolved Returned Inactive duplicate InActive error

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Events	Event Status Change Reason	Indicates the reason for the change in the event status.	Duplicate Reviewed Return Error
Carrier Events	Event Type	Type of event indicated.	Collision Conviction Inspection
Carrier Events	Event Vehicle Jurisdiction	Identifies the geographic jurisdiction of the vehicle involved in the event.	CAAB, CAB, CAON
Carrier Events	Event Vehicle Plate Number	The unique identifier printed on the licence plate involved in the event.	alphanumeric
Carrier Events	National Safety Code Number	National Safety Code Number indicated for carriers outside of Ontario.	alphanumeric
Carrier Events	Out of Province Registrant Identification Number	Identification number that is assigned to out of province carriers.	9 digit numeric number
Carrier Events	Registrant Identification Number (RIN)	A unique identifier for the registrant.	9 digit numeric number 175921702
Carrier Events	Vehicle Identification Number (VIN)	Vehicle Identification Number is a unique number assigned for each vehicle.	up to 17 characters alphanumeric
Carrier Facility Audit	120 Hours	Identifies the total accumulated hours of service in the 14 day assigned cycle.	Numeric with two decimal points
Carrier Facility Audit	70 Hours	Identifies the total accumulated hours of service in the 7 day assigned cycle.	Numeric with two decimal points

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Audit Conducted at	The location where the audit has taken place.	PPOB Terminal MTO Other
Carrier Facility Audit	Audit conducted at if other	Indicates the location where the audit has taken place if "Other".	alphanumeric
Carrier Facility Audit	Audit Ineligibility Reason	Indicates why the audit was not completed.	Seasonal Operator Other Carrier Can't be Found Carrier no Longer Operates Carrier Cancels VFA
Carrier Facility Audit	Carrier Contact Date	The date the auditor first contacted the carrier for the audit.	YYYY-MM-DD
Carrier Facility Audit	Charge Category	Identifies the general type of charge being laid.	Driver - fail to report Driver - fail to carry under vehicle inspection report Driver - fail to submit under vehicle inspection Driver - fail to keep proper daily log Driver - use recording device
Carrier Facility Audit	Charge Description	Describes the specific charge being laid.	failed to report to the operator a defect found on the said vehicle(s)
Carrier Facility Audit	Charged	Indicates the party that was charged.	Driver Carrier
Carrier Facility Audit	Completed	Identifies the vehicle profile has been completed.	Y N
Carrier Facility Audit	Completed	Indicates the completed profile for the selected driver.	Y N
Carrier Facility Audit	Conviction Records%	The score (up to 15%) from the Conviction Records component of the audit.	numeric with two decimal points

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	CVOR Number	A unique identifier issued to all commercial vehicle operators.	176-979-983
Carrier Facility Audit	Cycle	Indicates the assigned driving cycle in effect for the identified date.	7 14
Carrier Facility Audit	Cycle.	Identifies if driver on-duty hours exceed allowable hours in assigned cycle.	Y N
Carrier Facility Audit	Data Items 10%	The score (up to 10%) from the Data Item component of the audit.	numeric with two decimal points
Carrier Facility Audit	Date Assigned	The date that the audit was assigned to an auditor.	YYYY-MM-DD
Carrier Facility Audit	Date Issued	Identifies the date when the Periodic Mandatory Commercial Vehicle Inspection decal was issued.	YYYY-MM-DD
Carrier Facility Audit	Day	Indicates one of the dates in the profiled period of the hours of service profile.	YYYY-MM-DD
Carrier Facility Audit	Degree of Inaccuracy	Identifies the numeric degree of inaccuracy of hours of service compliance on a specific date.	Numeric with two decimal points
Carrier Facility Audit	Detection Reporting & Repair	Indicates if the Detection Reporting & Repair scoring was applied for the specific vehicle profile.	Y N

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Detection Reporting and Repair %	The score (up to 40%) from the Detection Reporting and Repair component of the audit.	numeric with two decimal points
Carrier Facility Audit	Driver Abstracts%	The score (up to 15%) from the Driver Abstracts component of the audit.	numeric with two decimal points
Carrier Facility Audit	Due Date	The date that the audit should be completed by; 60 days from date assigned.	YYYY-MM-DD
Carrier Facility Audit	Entrance Interview Date	The date the audit began.	YYYY-MM-DD
Carrier Facility Audit	Event Date	Identifies the event date (month) used in Detection Reporting & Repair for an event added by the auditor.	YYYY-MM-DD
Carrier Facility Audit	Event Date	Identifies the event date (month) used in Detection Reporting & Repair for an event that is populated by the system.	YYYY-MM-DD
Carrier Facility Audit	Exit Interview Date	The date the audit was completed.	YYYY-MM-DD
Carrier Facility Audit	Hours	Identifies the hours meter reading at the time of preventative maintenance.	Numeric with one decimal point
Carrier Facility Audit	Hours	Identifies the total hours of service for the specified date.	Numeric with two decimal points

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Hours in Violation	identifies the number of hours in violation on a specific date.	Numeric with two decimal points
Carrier Facility Audit	Hours Violation	Identifies the combined number of hours in violation of hours of service for the sampled month.	Numeric with two decimal points
Carrier Facility Audit	Hours.	Identifies if driver on-duty time exceeds daily maximum of 14 hours.	Y N
Carrier Facility Audit	Intervention Number	A unique identifier for an intervention record.	numeric
Carrier Facility Audit	Length of audit	Time elapsed between the start and end date of the audit.	Whole number numeric
Carrier Facility Audit	Local	Identifies whether on the operator's instructions, a commercial motor vehicle is driven solely within a radius of 160 kilometres of the driver's starting location and the driver returns at the end of the day to the location from which he or she started.	Y N
Carrier Facility Audit	Log Required	Identifies whether the driver is required to maintain a driver's daily log.	Y N

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Month	Identifies the timeframe of the sampled driver's hours of service records.	December, January
Carrier Facility Audit	No Contact	Indicates that the audit was complete even though carrier was not engaged and the approval provided.	Y N
Carrier Facility Audit	No Maintenance Statement	Indicates that the carrier does not have a written maintenance statement.	Y N
Carrier Facility Audit	No Notice	Indicates that the audit was conducted with no prior warning.	Y N
Carrier Facility Audit	Occurrence Date	Identifies the date of the legislative or regulatory violation.	YYYY-MM-DD
Carrier Facility Audit	Odometer	Identifies the odometer reading at the time of preventative maintenance.	Numeric with one decimal point
Carrier Facility Audit	Odometer	Identifies the odometer reading at the time of Periodic Mandatory Commercial Vehicle Inspection.	Whole number numeric
Carrier Facility Audit	Odometer Reading	Identifies the odometer reading at the time of the event used in Detection Reporting and Repair added by the auditor.	Numeric with one decimal point

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Odometer Reading	Identifies the odometer reading at the time of the event used in Detection Reporting and Repair that is populated by the system.	Numeric with one decimal point
Carrier Facility Audit	Operator Collisions%	The score (up to 10%) from the Operator Collisions component of the audit.	numeric with two decimal points
Carrier Facility Audit	Plate No.	Plate ID that is attached to the vehicle.	alphanumeric
Carrier Facility Audit	Plate Number	Identifies the plate identifier that was attached to the vehicle being driven on a specific date.	alphanumeric
Carrier Facility Audit	PM Intervals %	The score (up to 30%) from the Preventative Maintenance component of the audit.	numeric with two decimal points
Carrier Facility Audit	PM Program/Intervals	Indicates if the Preventative Maintenance Program scoring was applied for the specific vehicle profile.	Y N
Carrier Facility Audit	PMCVI	Indicates if the Periodic Mandatory Commercial Vehicle Inspection scoring was applied for the specific vehicle profile.	Y N

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	PMCVI %	The score (up to 10%) from the Periodic Mandatory Commercial Vehicle Inspection component of the audit.	numeric with two decimal points
Carrier Facility Audit	Preventative Maintenance Date	Identifies the date when preventative maintenance was performed on the vehicle.	YYYY-MM-DD
Carrier Facility Audit	QMOE	Identifies the residual Quantified Margin of Error (QMOE) score reduced from 90 from the profile month of the selected driver.	Numeric with two decimal points
Carrier Facility Audit	Qualified Drivers %	The score (up to 60%) from the Qualified Drivers component of the audit.	numeric with two decimal points
Carrier Facility Audit	Quantified Margin of error 90%	The score (up to 90%) from the Quantified Margin of Error component of the audit.	numeric with two decimal points
Carrier Facility Audit	Records	Indicates if the Vehicle Records scoring was applied for the specific vehicle profile.	Y N
Carrier Facility Audit	Records %	The score (up to 20%) from the Records component of the audit.	numeric with two decimal points

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Facility Audit	Status	Identifies the current status of the audit.	Recommended Under Review Reassigned Closed Ready for Closure Assigned
Carrier Facility Audit	Total Hours	Identifies the total number of hours on duty during the sampled month.	Numeric with two decimal points
Carrier Facility Audit	US Dot Number	United States Department of Transportation licence number in the United States of America.	Minimum 8 digit numeric
Carrier Facility Audit	VIN Number	A serial number assigned to each vehicle.	17-character alphanumeric string
Carrier Facility Audit	Violation Type	Describes the specific type of hours of service violation on a specific date.	Cycle 70 Hours in 7 Days Cycle 120 Hours in 14 Days Drive After 13 Hours Drive After 14 Hours Worked
Carrier Interventions	Intervention Notice Type	The type of notice that was given by the Deputy Registrar of Motor Vehicles.	Cancellation Fleet Limitation Seizure Suspension
Carrier Interventions	Disputed	An indicator to identify if the safety rating intervention has been disputed.	Y, N
Carrier Interventions	Intervention Audit Exit Date	The date the on-site audit is complete.	YYYY-MM-DD

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Intervention Audit Number of Charges	Indicates the number of provincial offence notices issued under the Highway Traffic Act as a result of the carrier compliance audit.	Numeric whole number
Carrier Interventions	Intervention Audit Result	Indicates whether the carrier compliance audit was passed, failed or incomplete.	Pass Fail
Carrier Interventions	Intervention Audit Status	Indicates the current status of the carrier compliance audit.	Under Review Ready for Closure Reassigned Recommended Closed Assigned
Carrier Interventions	Intervention Audit Vehicle Profile Compliance Rate %	Measures the vehicle profile calculated compliance score achieved in the carrier compliance audit and expressed as a percentage.	Numeric with two decimal points with a %
Carrier Interventions	Intervention Change Safety Rating To	The proposed safety rating as requested within this intervention.	Satisfactory, Conditional, Excellent
Carrier Interventions	Intervention Child	An indicator that identifies if this intervention is related to a parent intervention on an affiliated carrier.	Y, N
Carrier Interventions	Intervention Closed Date	The date the intervention was completed.	YYYY-MM-DD

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Intervention Commercial Vehicle Operators Registration Number Status	Commercial vehicle operator registration status at the time intervention was created.	Registered, Expired, Revoked, Cancelled, Suspended, Not Registered, Terminated
Carrier Interventions	Intervention Created Date	The date in which the intervention was added to the system	YYYY-MM-DD
Carrier Interventions	Intervention Current Safety Rating	The safety rating that was in place at the time the intervention was created.	Satisfactory, Conditional, Excellent
Carrier Interventions	Intervention Date	The date the intervention occurred (ie. The date that shows on the abstract.	YYYY-MM-DD
Carrier Interventions	Intervention District	Identifies the geographical district to which the audit was assigned	Numeric whole number
Carrier Interventions	Intervention Due Date	The date in which the intervention should be completed before it is marked as closed. (number of days after it is logged, before it is closed.	YYYY-MM-DD
Carrier Interventions	Intervention Hours of Service Compliance Rate %	Measures the hours of service calculated compliance score achieved in the carrier compliance audit and expressed as a percentage.	Numeric with two decimal points with a %
Carrier Interventions	Intervention Interview Date	The date that a carrier interview occurred.	YYYY-MM-DD

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Intervention Interview Invitation Date	The date that the carrier was sent an invitation for an interview.	YYYY-MM-DD
Carrier Interventions	Intervention Interview Schedule Date	The date that a carrier interview has been scheduled to take place.	YYYY-MM-DD
Carrier Interventions	Intervention Number (ID)	Unique identifier for an intervention record.	Display As Is
Carrier Interventions	Intervention Order Type	The type of sanction/refusal that was ordered by the Deputy Registrar of Motor Vehicles.	Rescind Refusal
Carrier Interventions	Intervention Outcome	Identifies the result of an intervention.	No Action Rescind Sanction-Cancel
Carrier Interventions	Intervention Overall Violation Rate %	The Overall Violation Rate at the time the intervention was created	Numeric with 2 decimal points with % symbol
Carrier Interventions	Intervention Parent	An indicator that identifies if the intervention has related interventions on affiliated carriers.	Y, N
Carrier Interventions	Intervention Proposed Safety Rating	The proposed safety rating that was in place at the time the intervention was created.	Satisfactory, Conditional, Excellent
Carrier Interventions	Intervention Qualification Records and Reporting Compliance Rate %	Measures the Qualification Records and Reporting calculated compliance score achieved in the carrier compliance audit and expressed as a percentage.	Numeric with two decimal points with a %

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Intervention Review and Action Carrier Date	The date the RAC was created that resulted in this intervention being created.	YYYY-MM-DD
Carrier Interventions	Intervention Safety Rating Disputed Date	The date the safety rating dispute was received from the carrier pertaining to this intervention.	YYYY-MM-DD
Carrier Interventions	Intervention Safety Rating Effective Date	The date in which the proposed safety rating will become effective after the dispute period.	YYYY-MM-DD
Carrier Interventions	Intervention Safety Rating Proposed Date	The date in which the current proposed safety rating was recommended.	YYYY-MM-DD
Carrier Interventions	Intervention Sanction End Date	The date that the sanction that was ordered by the Deputy Registrar of Motor Vehicles ended.	YYYY-MM-DD
Carrier Interventions	Intervention Sanction Start Date	The date that the sanction that was ordered by the Deputy Registrar of Motor Vehicles became effective.	YYYY-MM-DD
Carrier Interventions	Intervention Sanctions Number of Vehicles Permitted	Indicates the restricted size of the fleet imposed by the Deputy Registrar of Motor Vehicles.	Numeric whole number ##

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Intervention Sanctions Show Cause Date	The date and time that has been scheduled to allow the carrier a meeting with the Deputy Registrar of Motor Vehicles pertaining to a proposed action.	YYYY-MM-DD
Carrier Interventions	Intervention Status	The state in which the intervention is in at any given time	Appealed Assigned Closed Action Closed No Action Created Disputed/Show Cause Open Ordered
Carrier Interventions	Intervention Type	The intervention that has occurred.	Interviews Audit Warnings Sanctions Refusal Safety Rating Changes
Carrier Interventions	Intervention Warning Letter Sent Date	The date the warning letter was issued.	YYYY-MM-DD
Carrier Interventions	Intervention Warning Letter Type	Indicates whether the warning letter was system automated or manually generated.	Other - Manual Threshold - Manual Threshold - Automated
Carrier Interventions	Last Intervention Date	The date in which the client last incurred an intervention	YYYY-MM-DD
Carrier Interventions	Registrant Identification Number	Registrant Identification Number is a unique identifier for the registrant.	9 digit numeric value

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Interventions	Review and Action Carrier #	The system generated number that has been assigned to the review and action carrier type for the specific performance analysis that generated this intervention.	8-15 characters with hyphen
Carrier Performance Monitoring	Performance Analysis Kilometer Rate per Month	The calculated average kilometers travelled per month for the specified time period reported.	Numeric with 2 decimal points ##.##
Carrier Performance Monitoring	Performance Analysis Collision Percentage of Set Threshold	A measure of a carrier's collision safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period.	Numeric with two decimal points
Carrier Performance Monitoring	Performance Analysis Collision Set Threshold Points for the Rate of Kilometric Travelled for the Time Period	An operator's threshold is the maximum violation rate deemed acceptable for that specific operator.	Numeric with two decimal points

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Conviction Percentage of Set Threshold	A measure of a carrier's conviction safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period.	Numeric with two decimal points
Carrier Performance Monitoring	Performance Analysis Conviction Set Threshold Points for the Rate of Kilometric Travelled for the Time Period	An operator's threshold is the maximum violation rate deemed acceptable for that specific operator.	Numeric with two decimal points
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Commercial Vehicle Safety Alliance Inspections Conducted	The number of Commerical Vehicle Safety Alliance inspections conducted during the performance analysis period used to calculate the inspection violation rate.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Collision Breakdown by Kilometers Duration in Months	The duration of the collision performance analysis period for each kilometric travel change.	Numeric with one decimal point.
Carrier Performance Monitoring	Performance Analysis Collision Breakdown by Kilometers Period from	The start of the collision performance analysis period for each kilometric travel change.	YYYY-MM-DD

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Collision Breakdown by Kilometers Period to	The end of the collision performance analysis period for each kilometric travel change.	YYYY-MM-DD
Carrier Performance Monitoring	Performance Analysis Collision Breakdown by Kilometers Travelled per month	The average kilometers travelled per month for the collision performance analysis for each kilometric travel change.	Numeric with two decimal points
Carrier Performance Monitoring	Performance Analysis Collision Breakdown of Events by Time Period	The total number of collisions which were assigned during the performance analysis period.	Numeric whole number
Carrier Performance Monitoring	Performance Analysis Collision Breakdown of Points by Time Period	The total number of collision CVOR severity points which were assigned during the performance analysis period.	Numeric whole number
Carrier Performance Monitoring	Performance Analysis Collision Breakdown Type of Kilometric Rate of Travel	Identifies whether the collision breakdown kilometric rate of travel was actual, prorated or estimated.	Actual Estimated Prorated

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Collision Contribution in Percentage	A measure of a carrier's collision safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period weighted at 40% of their overall performance.	Numeric round to two decimal points with a % sign 0% 999% 68.35%
Carrier Performance Monitoring	Performance Analysis Collision Total Duration in Months	Indicates the number of months used in the collision violation rate for up to 24 months	Numeric with 2 decimal points ##.##
Carrier Performance Monitoring	Performance Analysis Collision Total Events	The total number of collisions which occurred during the performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Collision Total Points	The calculation of total CVOR severity points assigned to collisions based on all collisions for the performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Collision Total Set Threshold in Percentage	A measure of a carrier's collision safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period.	Numeric with 2 decimal points with a % sign ##.##

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown by Kilometers Duration in Months	The duration of the conviction performance analysis period for each kilometeric travel change.	Numeric with one decimal point.
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown by Kilometers Period to	The end of the conviction performance analysis period for each kilometeric travel change.	YYYY-MM-DD
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown by Kilometers Travelled per month	The average kilometers travelled per month for the conviction performance analysis for each kilometeric travel change.	Numeric with two decimal points
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown of Points by Time Period	The total number of conviction CVOR severity points which were assigned during the performance analysis period.	Numeric whole number
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown Type of Kilometeric Rate of Travel	Identifies whether the conviction breakdown kilometeric rate of travel was actual, prorated or estimated.	Actual Estimated Prorated
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown by Kilometers Period from	The start of the conviction performance analysis period for each kilometeric travel change.	YYYY-MM-DD

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Conviction Breakdown of Events by Time Period	The total number of conviction which were assigned during the performance analysis period.	Numeric whole number
Carrier Performance Monitoring	Performance Analysis Conviction Contribution in Percentage	A measure of a carrier's conviction safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period weighted at 40% of their overall performance.	Numeric round to two decimal points with a % sign 0% 999% 68.35%
Carrier Performance Monitoring	Performance Analysis Conviction Total Duration in Months	Indicates the number of months used in the conviction violation rate for up to 24 months	Numeric with 2 decimal points ##.##
Carrier Performance Monitoring	Performance Analysis Conviction Total Events	The total number of conviction which occurred during the performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Conviction Total Points	The calculation of total CVOR severity points assigned to conviction based on all convictions for the performance analysis period.	Numeric whole number ##

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Conviction Total Set Threshold in Percentage	The number of conviction points in a given period for a specified rate of travel that will result in being at 100 percent of conviction threshold. Used to calculate the conviction contribution percentage.	Numeric with 2 decimal points with a % sign
Carrier Performance Monitoring	Performance Analysis Created Date	The date the analysis was created in the system.	YYYY-MM-DD
Carrier Performance Monitoring	Performance Analysis Duration in Months	The length of elapsed time of the performance analysis period	0-24, up to 2 decimal points
Carrier Performance Monitoring	Performance Analysis From Date	The start of the performance analysis period	YYYY-MM-DD
Carrier Performance Monitoring	Performance Analysis Inspection Contribution in Percentage	A measure of a carrier's inspection safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period weighted at 20% of their overall performance.	Numeric round to two decimal points with a % sign 0% 999% 68.35%

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Inspection-Driver Out of Service Rate in Percentage	The proportion of Commercial Vehicle Safety Alliance inspections that resulted in any driver being placed out of service expressed as a percentage of all inspections during the performance analysis period.	Numeric with 2 decimal points with a % sign ##.##
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Driver Points Assigned (D)	The number of CVOR severity points assigned based on Commercial Vehicle Safety Alliance defects related to driver performance for the performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Drivers Inspected	The total number of drivers inspected for the specific performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Set Inspection Threshold Points	The number of inspection CVOR severity points that occurred during a given period that will result in being at 100 percent of inspection threshold. Used to calculate the inspection contribution percentage.	Numeric value with two decimal points ##.##

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Vehicles Inspected	The total number of vehicles inspected for the specific performance analysis period not limited to one vehicle per inspection.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Inspection-Number of Vehicles Points Assigned (V)	The number of CVOR severity points assigned based on Commercial Vehicle Safety Alliance defects related to vehicle condition for the performance analysis period.	Numeric whole number ##
Carrier Performance Monitoring	Performance Analysis Inspection-Overall Out of Service Rate in Percentage	The proportion of Commercial Vehicle Safety Alliance inspections that resulted in an out of service defect expressed as a percentage of all inspections during the performance analysis period.	Numeric with 2 decimal points with a % sign ##.##
Carrier Performance Monitoring	Performance Analysis Inspection-Percentage of Set Threshold	A measure of a carrier's inspection safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period.	Numeric with 2 decimal points with a % sign ##.##

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Inspection-Total Inspection Points Assigned (V + 0.687*D	The calculation of CVOR severity points assigned one to one for vehicle related points and .687 of each point applied for all driver related points.	Numeric value with two decimal points ##.##
Carrier Performance Monitoring	Performance Analysis Inspection-Vehicle Out of Service Rate in Percentage	The proportion of Commercial Vehicle Safety Alliance inspections that resulted in any vehicle being placed out of service expressed as a percentage of all inspections during the performance analysis period.	Numeric with 2 decimal points with a % sign ##.##
Carrier Performance Monitoring	Performance Analysis Number	Unique Identifier related to a specific performance analysis for a specific time period.	1-2EN8S5G 1-DYT-2045
Carrier Performance Monitoring	Performance Analysis Overall Violations Rate in Percentage	A measure of a carrier's overall safety performance as compared to their threshold and expressed as a percentage of threshold for a specific performance analysis period.	Numeric round to two decimal points with a % sign 0% 999% 68.35%

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Performance Monitoring	Performance Analysis Review and Action Carrier Number	The system generated number that has been assigned to the review and action carrier type for the specific performance analysis.	8-15 characters with hyphen
Carrier Performance Monitoring	Performance Analysis To Date	The end of the performance analysis period	YYYY-MM-DD
Carrier Performance Monitoring	Performance Analysis Type	The Analysis type that was performed	Primary PA Ad-hoc PA Delayed PA AES PA Abstract PA OnDemand PA
Carrier Registration	Carrier Registration Delete Flag	This record has been deleted.	Numeric 1 0
Carrier Registration	Carrier Suspension Date	If the Commercial Vehicle Operator Registration is suspended. This is the date on which the suspension begins.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Carrier Suspension End Date	The date on which the Commercial Vehicle Operator Registration suspension will be lifted.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Commercial Vehicle Operator Registration Certificate Refused	Indicates if a carrier has applied for and been refused a Commercial Vehicle Operator Registration certificate.	CVOR Refused Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Registration	Commercial Vehicle Operator Registration Number	Indicates the Commercial Vehicle Operator Registration number or the National Safety Code number if the vehicle is a commercial vehicle.	Numeric 21885
Carrier Registration	Extended Expiry Date	This date is set if the period in which the Commercial Vehicle Operator Registration is valid has been extended beyond the original expiry date.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Fleet Limitation Number of Vehicles Permitted	The number of commercial motor vehicles that can be operated simultaneously.	Numeric 50
Carrier Registration	Freeze Flag	Registrant Identification Number disallowed from any vehicle licensing transaction.	RIN Disallowed Not Applicable
Carrier Registration	Freeze Flag End date	The date on which a freeze flag will be in effect until.	Date (YYYY-MM-DD), (blank)
Carrier Registration	Freeze Flag Notice Date	The date on which a freeze flag was applied.	Date (YYYY-MM-DD), (blank)
Carrier Registration	Insurance Company	The name of the insurer.	Free form string Automobile Insurance Company
Carrier Registration	Insurance Indicator	Indicates if the carrier has insurance.	Has Insurance No Insurance Information Available

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Registration	Invalid Times	The number of days the Commercial Vehicle Operator Registration is in an invalid status (i.e. expired or suspended).	Numeric 50
Carrier Registration	Kilometric Travel Create Date	The date the kilometric travel information was inputted into the system.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Kilometric Travel Distance in Canada (outside of On)	The number of kilometers travelled outside of Ontario, but within Canada.	Numeric 5000
Carrier Registration	Kilometric Travel Distance Travelled in the US/Mexico	The number of kilometers travelled outside of Canada; specifically in the United States of America or Mexico.	Numeric 5000
Carrier Registration	Kilometric Travel Number of Double Shifted Vehicles	The number of vehicles on the road that are being double shifted.	Numeric 15
Carrier Registration	Kilometric Travel Number of Drivers	The number of drivers employed by the carrier.	Numeric 5
Carrier Registration	Kilometric Travel Number of Months Between Operation to and From Dates	The elapsed time between to and from date for kilometric travel.	Numeric 12
Carrier Registration	Kilometric Travel Ontario Distance Travelled	The number of kilometers travelled on Ontario roads.	Numeric 5000
Carrier Registration	Kilometric Travel Operation From Date	The start date of the period being used to represent the travel measurement period.	Date (YYYY-MM-DD) 1980-02-15

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Registration	Kilometric Travel Operation To Date	The end date of the period being used to represent the travel measurement period.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Kilometric Travel Total distance (Km)	The total of all distance travelled.	Numeric 15000
Carrier Registration	Kilometric Travel Total Number of Vehicles Being Operated	The number of vehicles on the road.	Numeric 50
Carrier Registration	Ministry of Transportation Enforcement District	A code representing a Ministry of Transportation geographical area in which the carrier is located.	2-digit numeric code representing the following location: 23 - Hamilton/Niagara 22, 25 - Halton South - Burlington, Mississauga, Oakville 27 - 407 ETR 22, 25 - Halton North - Milton, Halton Hills, Brampton, Mississauga 21 - Toronto 26 - Aurora 22 - Caledon 24 - Durham 33 - Waterloo 31 - London 32 - Windsor 41 - Kingston 42 - Ottawa 51, 52, 53 - Northeast - North Bay, Timmins, Sudbury 63, 61, 62 - Northwest - Sault Ste. Marie, Thunder Bay
Carrier Registration	National Safety Code Cancelled/Revoked in Other Jurisdiction	Indicates if the carrier has had a previous licence cancelled in a different jurisdiction.	Cancelled in Another Jurisdiction Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Carrier Registration	Original Issue Date	The date of issue for the first Commercial Vehicle Operator Registration certificate.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	Out of Province Registrant Identification Number (RIN)	Identifies the carrier's Out-of-Province Registrant Identification Number.	Free form string 12345678
Carrier Registration	Permission Status	The current state of the Commercial Vehicle Operator Registration.	Registered Expired Revoked Cancelled Suspended Non-Registered Terminated Licensed
Carrier Registration	Policy Number	The insurance policy number.	Free form string 12345678901
Carrier Registration	Region	The geographical region in which the Ministry of Transportation Enforcement District falls.	West Region Central West Region Eastern Region Northern Region Central East Region
Carrier Registration	Revoked Date	The date in which the Commercial Vehicle Operator Registration was revoked.	Date (YYYY-MM-DD) 1980-02-15
Carrier Registration	United States DOT #	United States Department of Transportation licence number in the United States of America.	Minimum 8 digit numeric 12345678
Collision Basic Info	Class of Collision Description	Description of the class of collision.	Fatal Injury Non Fatal Injury Property Damage Only Non-Reportable Other Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Collision Location Description	Description of the location of a collision. If a collision occurred at a location that is not a public roadway, it is considered to be an Off Highway collision. The public roadway includes the roadway and shoulder.	Non Intersection (on highway) Intersection Related (on highway) At Intersection (on highway) At or Near Private Drive (on highway) At Railway Crossing (on highway) Underpass or Tunnel (on highway) Overpass or Bridge (on highway) Other (on highway) Trail (off highway) Frozen Lake or River (off highway) Parking Lot (off highway) Other (off highway)
Collision Basic Info	County	Code indicating the County/District/Region or Municipality in which a collision occurred. This is a system derived field based on parentage tables for Municipality/District reported. See County Name.	2-character alphanumeric code
Collision Basic Info	County Name	Name of the County/District/Region or Municipality where a collision occurred.	SIMCOE WELLINGTON DURHAM

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Dangerous Goods Number	A code which indicates the dangerous goods product for the type of hazardous materials being transported by a vehicle involved in the collision.	Maximum 4 numeric
Collision Basic Info	Direction From Reference Point	If a reference point is entered, this value indicates the direction from the reference point to the collision location.	N S E W Accident happened on ramp Not Applicable
Collision Basic Info	Distance from Reference Point	If a reference point is entered, this value indicates the distance from the reference point to the collision location. See Unit of Measure Reference Point.	3-digit numeric 001
Collision Basic Info	Emergency Equipment Code	A code indicating emergency equipment in attendance at a collision site. See Emergency Equipment Description.	2-digit numeric code 01-05, 99
Collision Basic Info	Emergency Equipment Description	Description of the emergency equipment in attendance.	Fire truck Ambulance Air Rescue Hydro MTO Other

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Emergency Equipment Services Performed	Indicates the service performed by the emergency equipment at a collision site.	Free form string Attend to female passenger
Collision Basic Info	Environment Condition	A code which indicates the environment condition at the time of the collision. Up to two selections can be recorded. See Environment Condition Description.	2-digit numeric code 01-07, 99
Collision Basic Info	Environment Condition Description	A description of the environment condition at the time of the collision.	Clear Rain Snow Freezing Rain Drifting Snow Strong Wind Fog, Mist, Smoke, Dust Other
Collision Basic Info	GPS Latitude	Indicates the geographic north latitude coordinate in decimal degrees to the nearest 0.00000001.	Free form string
Collision Basic Info	GPS Longitude	Indicates the geographic west longitude coordinate in decimal degrees to the nearest 0.00000001.	Free form string
Collision Basic Info	GPS Z Coordinate	Indicates the elevation coordinate in meters to the nearest 0.001 meter.	Free form string, display as is

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Highway Number and Suffix	Indicates the provincial highway on which a collision occurred.	5-digit numeric 04010
Collision Basic Info	Impact Location	A code indicating the specific location of a collision impact. See Impact Location Description.	2-digit numeric code 01-99, 99, 00
Collision Basic Info	Impact Location Description	Indicates the specific location of a collision impact.	Within Intersection Through Lane Left Turn Lane Right Turn Lane Right Turn Channel Two-Way Left Turn Lane Passing Lane Left Shoulder Right Shoulder Not on Roadway - Left Side Not on Roadway - Right Side Off Highway Other Unknown
Collision Basic Info	Initial Impact Type	A code indicating the general path of the vehicle(s) immediately before the first impact. See Initial Impact Type Description.	2-character alphanumeric code 01-07, 99, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Initial Impact Type Description	Description of the general path of the vehicle(s) immediately before the first impact.	Approaching Angle Rear End Sideswipe Turning Movement Single Motor Vehicle - Unattended Single Motor Vehicle - Other Other Unknown
Collision Basic Info	Keypoint Number	Indicates the Linear Highway Referencing System section where a collision occurred (only for provincial highways).	5-digit numeric 00021
Collision Basic Info	Light	Code that indicates the light conditions at the time of a collision. See Light Description.	2-digit numeric code 01-08, 99
Collision Basic Info	Light Description	Describes the light conditions at the time of a collision.	Daylight Artificial Daylight Dawn Artificial Dawn Dusk Artificial Dusk Dark Artificial Dark Other
Collision Basic Info	Ministry of Transportation District	A code indicating the Ministry of Transportation district in which a collision occurred. See MTO District Name.	2-character alphanumeric code

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	MTO District Name	Indicates the Ministry of Transportation district for collisions occurring on provincial highways, where MTO area offices are located. MTO district code can be obtained from the Linear Highway Referencing System.	London
Collision Basic Info	MTOCollisionReferenceNumber	A unique identifier for collision reports on the collision system.	Free form numeric 1019192
Collision Basic Info	Municipality	Code indicating the Municipality in which a collision occurred. See Municipality Name.	4-character alphanumeric code
Collision Basic Info	Municipality Name	Name of the Municipality in which a collision occurred.	CITY OF TORONTO TOWN OF OAKVILLE
Collision Basic Info	Number of Lanes	Indicates the number of lanes on a road. The total number of through lanes on the roadway is entered. On divided facilities and complex freeways, through lanes are recorded for both directions of travel. Merge lanes, transfer lanes, turn lanes or ramps are not included.	Numeric 4

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Ontario Provincial Police (OPP) Report Number Detachment	Indicates the Ontario Provincial Police (OPP) detachment in which a collision is occurred.	2-digit; Display as is If the value is null, then display as "Non-OPP"
Collision Basic Info	Posted Advisory Speed in KMPH	Indicates the advised speed for the road. Advisory posted speed limits are posted on ramps and curves. These warning signs are black on yellow background.	3-digit numeric 60
Collision Basic Info	Posted Maximum Speed in KMPH	Indicates the maximum posted speed limit. The maximum posted speed limit is entered for a roadway. Signs are black on white background. There is always a maximum posted speed. Ramps or right-turn channels have the same posted speed as the through road, unless indicated otherwise.	3-digit numeric 100
Collision Basic Info	Ramp Number	Indicates the highway ramp number where a collision occurred.	2-digit numeric; display as is

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Road / Reference Point	A road where the initial impact occurred even if a collision concluded on another roadway. If a collision occurred “at-intersection” or is “intersection-related”, this is a second road that helps to identify a collision location.	Free form string
Collision Basic Info	Road Alignment	A code that indicates the horizontal and vertical alignment of a road at a collision site. If a collision occurred at or near an intersection, the alignment of each road is provided.	2-character alphanumeric code 01-04, UK
Collision Basic Info	Road Alignment Description	Description of the horizontal and vertical alignment of a road at a collision site. If a collision occurred at or near an intersection, the alignment of each road is provided.	Straight on Level Straight on Hill Curve on Level Curve on Hill Not Applicable Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Road Character	A code indicating the physical nature of the roadway on which a collision occurred. If a collision occurred at or near an intersection, the road character of each roadway is described. See Road Character Description.	2-character alphanumeric code 01-09, UK
Collision Basic Info	Road Character Description	Description of the physical nature of the roadway on which a collision occurred. If the collision occurred at or near an intersection, the road character of each roadway is described.	Undivided One-Way Undivided Two-Way Divided with Restraining Barrier Divided with No Barrier Ramp Collector Lane Express Lane Transfer Lane Other Not Applicable
Collision Basic Info	Road Condition	A code indicating the road condition at which a collision occurred. Road Condition Description.	2-character alphanumeric code 01-03, UK
Collision Basic Info	Road Condition Description	Description of the road condition at which a collision occurred. If a collision occurred at or near an intersection, the condition of each roadway is described.	Good Poor Under Repair or Construction Not Applicable Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Road Jurisdiction	Code indicating the authority having jurisdiction over the road(s) at a collision location. See Road Jurisdiction Description.	2-digit numeric code 01-07, 99
Collision Basic Info	Road Jurisdiction Description	Description of the authority having jurisdiction over the road(s) at a collision site.	Municipal Provincial highway Township County or district Regional municipality Private property Federal Other
Collision Basic Info	Road Pavement Markings	A code indicating the condition of pavement markings on a collision site. See Road Pavement Markings Description.	2-character alphanumeric code 01-04, UK
Collision Basic Info	Road Pavement Markings Description	Description of the condition of pavement markings at a collision site. If a collision occurred at or near an intersection, the pavement markings for each road are provided.	Exist Non-Existent Obscured Faded Not Applicable Unknown
Collision Basic Info	Road Surface	A code indicating the material type which best describes the surface of a road at a collision location. See Road Surface Description.	2-character alphanumeric code 01-08, 99, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Road Surface Condition	A code indicating the road surface condition at a collision site. See Road Surface Condition Description.	2-character alphanumeric code 01-09, 99, 00, UK
Collision Basic Info	Road Surface Condition Description	Indicates the road surface condition at a collision site. For collisions occurring at or near an intersection, the condition for each road surface is entered.	Dry Wet Loose Snow Slush Packed Snow Ice Mud Loose Sand or Gravel Spilled Liquid Other Unknown Not Applicable Unknown
Collision Basic Info	Road Surface Description	Description of the material type which best describes the surface of a road at a collision site. If a collision occurred at or near an intersection, the road surface of each roadway is described.	Asphalt Oil Treated Gravel Gravel or Crushed Stone Concrete Earth Wood Steel Brick/Interlocking Stone Other Not Applicable Unknown
Collision Basic Info	Through Lane Number	Indicates the through lane number.	2-digit numeric
Collision Basic Info	Traffic Control	A code indicating the type of traffic control at a collision location. See Traffic Control Description.	2-character alphanumeric code 01-10, 99, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Traffic Control Condition	A code indicating the condition of the traffic control device at the time of a collision (not subsequent damage). See Traffic Control Condition Description.	2-digit numeric code 01-04, (blank)
Collision Basic Info	Traffic Control Condition Description	Indicates the condition of the traffic control device at the time of a collision (not subsequent damage).	Functioning Not-Functioning Obscured Missing/Damaged Not Applicable
Collision Basic Info	Traffic Control Description	Description of the type of traffic control at a collision location. If more than one device exists, the traffic control device that had the greatest bearing on the collision is recorded. Speed limits and pavement markings are not traffic control devices for this field.	Traffic Signal Stop Sign Yield Sign Pedestrian Crossover Police Control School Guard School Bus Traffic Gate Traffic Controller No Control Other Unknown
Collision Basic Info	Unit of Measure Reference Point	If a reference point is entered, this value indicates the unit of measurement from the reference point to the collision location, as entered on a collision report.	Metre KM Accident happened on ramp Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Basic Info	Vehicle Key	System generated key to track vehicles involved in collisions.	Numeric 23456
Collision Driver/Vehicle Info	Air Brakes Description	Description of whether the vehicle is equipped with air brakes.	Air Brake No Air Brake Unknown Not Applicable
Collision Driver/Vehicle Info	Approximate Speed in KMPH	Indicates the approximate speed of the vehicle in KMPH.	Numeric 100
Collision Driver/Vehicle Info	Body Style	Indicates the vehicle body style.	Free form string 2DR 4DR Motorcycle Pickup Bus Bicycle
Collision Driver/Vehicle Info	Breath Test Code	Flags whether or not (Y or N) a driver took a breathalyzer/blood test.	Y N (blank)
Collision Driver/Vehicle Info	Carrier Jurisdiction Description	Indicates the jurisdiction where the commercial vehicle is registered.	Alberta B.C. Manitoba New Brunswick Newfoundland Nova Scotia Ontario P.E.I. Quebec Saskatchewan Yukon & North West Territories U.S.A. Overseas or international Unknown Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Company Operating As Name	Indicates the company's operating as name, for example a Commercial Operator / Carrier 'Operating As' Name.	Free form string "Becks Taxi", "Blue Taxi", "XTL Transport", "JB Hunt Transport Services", "Schneider Transportation and Logistics"
Collision Driver/Vehicle Info	CVOR#	Indicates the CVOR number or the National Safety Code number if the vehicle is commercial vehicle.	Numeric 21885
Collision Driver/Vehicle Info	Driver Action	A code indicating the apparent driver action taken immediately prior to a collision. See Driver Action Description.	2-digit numeric code 01-12, 99, (blank)
Collision Driver/Vehicle Info	Driver Action Description	Description of the apparent driver action taken immediately prior to a collision. Does not apply to evasive action taken by a driver to avoid a collision.	Driving Properly Following too Close Exceeding the Speed Limit Speed too Fast for Conditions Speed too Slow Improper Turn Disobeyed Traffic Control Failed to Yield Right of Way Improper Passing Lost Control Wrong Way on One Way Road Improper Lane Change Other Not Applicable (No Driver)
Collision Driver/Vehicle Info	Driver Age	Indicates the age of a driver at the time of a collision.	Numeric 33

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Driver Charged	Flags whether or not (Y or N) a driver was charged with an offence resulting from the collision involvement.	Y N (blank)
Collision Driver/Vehicle Info	Driver Charges Act	The Code or Act under which an individual was charged.	Maximum 3 characters
Collision Driver/Vehicle Info	Driver Charges Clause	The clause under which an individual was charged.	Maximum 3 characters
Collision Driver/Vehicle Info	Driver Charges Item	The item under which an individual was charged.	Maximum 2 characters
Collision Driver/Vehicle Info	Driver Charges Section	The section under which an individual was charged.	Maximum 5 characters
Collision Driver/Vehicle Info	Driver Charges Subsection	The sub-section under which the individual was charged.	Maximum 3 characters
Collision Driver/Vehicle Info	Driver Condition	A code indicating the condition of a driver at the time of a collision. See Driver Condition Description.	1-digit numeric code 1-9, (blank)
Collision Driver/Vehicle Info	Driver Condition Description	Description the condition of a driver at the time of a collision. If more than one condition applies, the condition most relevant to the collision is entered.	Normal Had Been Drinking Ability Impaired, Alcohol Over .08 Ability Impaired, Alcohol Ability Impaired, Drugs Fatigue Medical or Physical Disability Inattentive Other Driver Condition Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Driver Licence Class Required To Drive Vehicle	Indicates the driver's licence class required to drive a specific vehicle involved the collision. A class "M" driver's licence is required to drive a motorcycle. See Driver Licence Class Required To Drive Vehicle Description.	Alphabetic code A to H, J, L to N, P, R, or UK.
Collision Driver/Vehicle Info	Driver Licence Class Required To Drive Vehicle Description	Describes of the driver's licence class required to drive the vehicle involved in the collision.	Tractor-Trailer Or Truck-Trailer Combination School Purposes Bus Regular Bus Truck Or Combination Provided The Towed Vehicle Is Not Over 4600kg School Purposes Bus - Maximum Of 24 Passenger Capacity Regular Bus Maximum Of 24 Passenger Capacity And Ambulances Automobile, Small Truck Or Combination Up To 11,000kg Provided The Towed Vehicle Is Not Over 4,600kg G1 (Novice G, Level 1) G2 (Novice G, Level 2) G Learner Motorcycles M1 (Novice M, Level 1) M2 (Novice M, Level 2) M Learner Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Driver Licence Conditions	A code indicating the driver's licence condition or endorsement. This information is taken directly from the driver's licence card. See Driver Licence entity; attribute called Driver Licence Condition for code descriptions.	Free form string X9 9 2
Collision Driver/Vehicle Info	Driver Province or State	A code indicating which jurisdiction issued the driver's licence. See Driver Province or State Description.	2-digit numeric code 01-14, (blank)
Collision Driver/Vehicle Info	Driver Province or State Description	Description of the jurisdiction that issued the driver's licence.	Alberta B.C. Manitoba New Brunswick Newfoundland Nova Scotia Ontario P.E.I. Quebec Saskatchewan Yukon & North West Territories U.S.A. Overseas or international Unknown Not Applicable
Collision Driver/Vehicle Info	Driver Sex	Driver's gender.	Male Female Unknown Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Driver Suspended	Flags whether or not (Y or N) the driver's licence was under suspension at the time of a collision. See Driver Suspended Description.	Y N (blank)
Collision Driver/Vehicle Info	Driver Suspended Description	Describes if the driver's licence was under suspension at the time of a collision.	Driver suspended Driver not suspended Unknown
Collision Driver/Vehicle Info	Driver's Licence Number	A unique 15 character identifier assigned to each driver in Ontario.	15-character alphanumeric; Display as is X09152643595718
Collision Driver/Vehicle Info	Emergency Signals In Use	Indicates whether the directly involved vehicle(s) used emergency signals.	Sirens Lights All Not Applicable
Collision Driver/Vehicle Info	First Trailer Plate Number	Indicates the plate number attached to the first trailer.	8-character alphanumeric string
Collision Driver/Vehicle Info	Impact Point (1)	A code indicating the location of vehicle damage or most severe area of impact to the vehicle involved in the collision. See Impact Point (1) Description.	2-character alphanumeric code 01-19, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Impact Point (1) Description	Describes the location of vehicle damage or the most severe area of impact to the vehicle involved in the collision.	Right Front Corner Right Front Right Centre Right Rear Right Rear Corner Back Centre Left Rear Corner Left Rear Left Centre Left Front Left Front Corner Front Centre Front Complete Right Side Complete Back Complete Left Side Complete Top Undercarriage No Contact Unknown
Collision Driver/Vehicle Info	Impact Point (2)	A code indicating the location of vehicle damage or the second most severe area of impact to the vehicle involved in the collision. See Impact Point (2) Description	2-character alphanumeric code 01-19, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Impact Point (2) Description	Describes the location of vehicle damage or the second most severe area of impact to the vehicle involved in the collision.	Right Front Corner Right Front Right Centre Right Rear Right Rear Corner Back Centre Left Rear Corner Left Rear Left Centre Left Front Left Front Corner Front Centre Front Complete Right Side Complete Back Complete Left Side Complete Top Undercarriage No Contact Unknown
Collision Driver/Vehicle Info	Initial Direction of Travel	Indicates the initial direction of travel before the collision. Direction(s) in which the involved vehicle(s) were travelling prior to collision.	2-character alphanumeric code 01-04, UK
Collision Driver/Vehicle Info	Initial Direction of Travel Description	Description of the initial direction of travel before the collision. Direction(s) in which the involved vehicle(s) were travelling prior to collision.	North South East West Unknown
Collision Driver/Vehicle Info	Make of Vehicle	Indicates the first four characters of a vehicle make.	4-character string HOND

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Model of Vehicle	Indicates the first four characters of a vehicle model.	4-character string CIVI
Collision Driver/Vehicle Info	Model Year	Indicates the last two characters of a model year.	2-digit numeric 00
Collision Driver/Vehicle Info	Number of Vehicle Occupants	Indicates the number of occupants in the vehicle (only for fatal and injury MVCs)	Free format numeric
Collision Driver/Vehicle Info	Plate Number	Indicates the vehicle plate number.	Free form string
Collision Driver/Vehicle Info	Sequence of Events	A code indicating the order of events during a collision for every involved motor vehicle until each comes to rest is entered. See Sequence of events Description.	2-digit numeric code 01-09, 20-28, 50-66, 97-99

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Sequence of Events Description	Describes the order of events during a collision for every involved vehicle until each comes to a rest. There are three categories to choose from: moveable objects, other events or fixed objects.	Moveable Objects - Other Motor Vehicle Moveable Objects - Unattended Vehicle Moveable Objects - Pedestrian Moveable Objects - Cyclist Moveable Objects - Railway Train Moveable Objects - Street Car Moveable Objects - Farm Tractor Moveable Objects - Domestic Animal Moveable Objects - Wild Animal Other Events - Ran Off Road Other Events - Skidding / Sliding Other Events - Jackknifing Other Events - Load Spill Other Events - Fire / Explosion Other Events - Submersion Other Events - Rollover
Collision Driver/Vehicle Info	Sequence of Events Offset	A code indicating the distance from the travelled lanes of the roadway to the vehicle location related to this particular event. See Sequence of Events Offset Description.	2-digit numeric code 01-08

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Sequence of Events Offset Description	Provides the distance measurement (in metres) from the travelled lanes of the roadway to the vehicle location related to this particular event.	less than 3.1 meters (left) 3.1 to 6 meters (left) 6.1 to 9 meters (left) more than 9 meters (left) less than 3.1 meters (right) 3.1 to 6 meters (right) 6.1 to 9 meters (right) more than 9 meters (right)
Collision Driver/Vehicle Info	Towed Trailer Type	A code indicating the trailer type for single and double trailer combinations with a gross weight over 4600 kg. See Towed Trailer Type Description.	2-character alphanumeric code 01-07, 99, UK
Collision Driver/Vehicle Info	Towed Trailer Type Description	Describes the trailer type for single and double trailer combinations with a gross weight over 4600 kg.	Van Flat Bed or Flat Bed with Racks Low Bed or Float Tank Dump Car Carrier Livestock Other Unknown
Collision Driver/Vehicle Info	Towed Vehicle Type	Indicates the type of vehicle being towed.	2-character alphanumeric code 01-10, 99, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Towed Vehicle Type Description	Description of the type of vehicle being towed.	Recreation Trailer or Semi-trailer (house, tent) Boat Trailer Small Utility Trailer Wheeled Device or Apparatus Large Full Trailer Large Semi-trailer Double (Semi-trailer & Semi-trailer) Double (Semi-trailer & Trailer) Farm Equipment Towed Motor Vehicle Other Not Applicable
Collision Driver/Vehicle Info	Trailer Connection	A code indicating the trailer connection. See Trailer Connection Description.	2-character alphanumeric code 01-07, 99, UK
Collision Driver/Vehicle Info	Trailer Connection Description	Describes the trailer connection.	Single Drawbar Dolly: A Train 5th Wheel Connection Only: B Train Double Drawbar Dolly: C Train Other Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Vehicle Colour	Indicates the colour of a vehicle.	BGE: Beige BLK: Black BLU: Blue BRN: Brown BRZ: Bronze CPR: Copper CRM: Cream, Ivory GLD: Gold GRN: Green GRY: Grey MLT: Multicolour MRN: Maroon ONG: Orange PLE: Purple, Lavender, Mauve PNK: Pink RED: Red SIL: Silver, Aluminium, Stainless Steel TAN: Tan TRQ: Turquoise WHI: White YEL: Yellow UK: (blank)
Collision Driver/Vehicle Info	Vehicle Condition	A code indicating the condition of the vehicle and any obvious defect which may have affected the operation of the vehicle and contributed to the cause of the collision. See Vehicle Condition Description.	2-digit numeric code 01-11, 99, 00

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Vehicle Condition Description	Describes of the condition of the vehicle and any obvious defect which may have affected the operation of the vehicle and contributed to the cause of the collision.	No Apparent Defect Service Breaks Defective Steering Defective Tire Puncture or Blow Out Tire Tread Insufficient Head Lamps Defective Other Lamps or Reflectors Defective Engine Control Defective Wheels or Suspension Defective Vision Obscured Trailer Hitch Defective Other Defect Not known
Collision Driver/Vehicle Info	Vehicle Damage Level	Indicates the severity of vehicle damage.	2-character alphanumeric code 01-05, UK
Collision Driver/Vehicle Info	Vehicle Damage Level Description	Description of the severity of vehicle damage.	None Light Moderate Severe Demolished Unknown
Collision Driver/Vehicle Info	Vehicle Identification Number (VIN)	Vehicle Identification Number is a unique number assigned for each vehicle.	Maximum 17-character alphanumeric string
Collision Driver/Vehicle Info	Vehicle Key	System generated key to track vehicles involved in collisions	Numeric 23456
Collision Driver/Vehicle Info	Vehicle Loaded	Indicates whether the commercial vehicle was loaded or unloaded.	Y N (blank)

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Vehicle Manoeuvr	A code indicating the manoeuver that each vehicle was performing prior to the impact or the driver's realization that the impact might occur. It does not include any vehicle manoeuver taken to avoid a possible collision. See Vehicle Manoeuvre Description.	2-digit numeric code 01-14, 99, 00
Collision Driver/Vehicle Info	Vehicle Manoeuvre Description	Describes the manoeuver that each vehicle was performing prior to the impact or the driver's realization that the impact might occur. It does not include any vehicle manoeuver taken to avoid a possible collision.	Going Ahead Slowing or Stopping Overtaking Turning Left Turning Right Making "U" Turn Changing Lanes Merging Reversing Stopped Parked Disabled Pulling Away from Shoulder or Curb Pulling onto Shoulder or towards Curb Other Manoeuvre Unknown
Collision Driver/Vehicle Info	Vehicle Number in Collision	Number assigned to each vehicle involved in the collision. '01' is the vehicle that according to investigating police officer contributed most to the collision occurrence.	Numeric (padded with zero) 01 02

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Vehicle Province or State	A code indicating the province/jurisdiction that issued the vehicle plate. See Vehicle Province or State Description.	2-digit numeric code 01-14, (blank)
Collision Driver/Vehicle Info	Vehicle Province or State Description	Provides the province/jurisdiction that issued the vehicle plate.	Alberta B.C. Manitoba New Brunswick Newfoundland Nova Scotia Ontario P.E.I. Quebec Saskatchewan Yukon And North West Territories U.S.A. Other Foreign Unknown
Collision Driver/Vehicle Info	Vehicle Type	A code indicating the type of vehicle involved in the collision.	2-character alphanumeric code 01-36, 97-99, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Driver/Vehicle Info	Vehicle Type Description	Describes of the type of vehicle involved in the collision.	Automobile, Station Wagon, SUV Motorcycle Moped Passenger Van Pick-up Truck Delivery Van Tow Truck Truck – Open Truck – Closed Truck – Tank Truck – Dump Truck – Car Carrier Truck – Tractor Municipal Transit Bus Intercity Bus Other Bus School Bus School Van Other School Vehicle / Bus Motor Home Off-road 2 Wheels Off-road 3 Wheels Off-road 4 Wheels Other Off-road Motorized Snow Vehicle Farm Tractor
Collision Involved People	Injury Level	A code indicating the level of injuries suffered by the involved person. See Injury Level Description.	00-04, UK
Collision Involved People	Injury Level Description	Description of the level of injuries suffered by the involved person.	None Minimal Minor Major Fatal Unknown
Collision Involved People	Involved Person Age	Indicates the age of the involved person.	00-99 UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Involved People	Involved Person Sex	Indicates the sex of the involved person.	Male Female Unknown
Collision Involved People	Pedestrian Action	Indicates the action of the involved person, if a pedestrian. The action of any pedestrians immediately prior to their involvement or indirect involvement in the collision is recorded.	01-14, 99, UK, (blank)
Collision Involved People	Pedestrian Action Description	Description of the action of the involved person, if a pedestrian.	Crossing with Right of Way Crossing without Right of Way Crossing no Traffic Control Crossing Pedestrian Crossover Crossing Marked Crosswalk without Right of Way Walking on Roadway with Traffic Walking on Roadway against Traffic On Sidewalk or Shoulder Playing or Working on Highway Coming from Behind Parked Vehicle or Object Running onto Roadway Person Getting on/off School Bus Person Getting on/off Vehicle Pushing/Working on Vehicle Other Unknown

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Involved People	Pedestrian Condition	A code indicating the condition of the involved person, if a pedestrian. If more than 1 condition applies, the condition most relevant to the collision is entered. See Pedestrian Condition Description.	01-08, 99, UK, (blank)
Collision Involved People	Pedestrian Condition Description	Indicates the condition of the involved person, if a pedestrian. If more than 1 condition applies, the condition most relevant to the collision is entered.	Normal Had Been Drinking Ability Impaired, Alcohol Over .08 Ability Impaired, Alcohol Ability Impaired, Drugs Fatigue Medical or Physical Disability Inattentive Other Unknown
Collision Involved People	Person Key	Key to identify the collision involved person.	Numeric 456789
Collision Involved People	Position in Vehicle	A code indicating the position of the involved person in or outside the vehicle. See Position in Vehicle Description.	01-09, L1-L7, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Involved People	Position in Vehicle Description	Describes the position of the involved person in or outside the vehicle.	Front Seat Driver Side Front Seat Centre Front Seat Passenger Side Back Seat Driver Side Back Seat Centre Back Seat Passenger Side Rear of Vehicle or Trunk Hanger On Pedestrian On Lap in Front Seat Driver Side On Lap in Front Seat Centre On Lap in Front Seat Passenger Side On Lap in Back Seat Driver Side On Lap in Back Seat Centre On Lap in Back Seat Passenger Side On Lap in Rear of Vehicle or Trunk Unknown
Collision Involved People	Safety Equipment Determined By	A code indicating who determined the type of safety equipment used. Provides additional information to assess reliability of safety equipment in use. The officer records the most reliable source. See Safety Equipment Determined By Description.	01-03, UK

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Collision Involved People	Safety Equipment Determined By Description	Indicates who determined the type of safety equipment used.	Involved Driver / Passenger Investigating Officer Witness Unknown
Collision Involved People	Safety Equipment Used Description	Describes the safety equipment used by the involved person in a collision involving injuries or fatalities.	Lap and Shoulder Belt Lap Belt Only Lap Belt Only of Combined Assembly Child Safety Seat Used Incorrectly Child Safety Seat Used Correctly Air Bag Deployed Booster Seat Helmet Equipment not used but Available No Equipment Available Other Safety Equipment Used Unknown
Collision Involved People	Vehicle Key	Key to identify the vehicle the person belonged to.	Numeric 123456
Conviction	Appeal Status	The status of a legal appeal.	1 - Under appeal 2 - Quashed on appeal 3 - Sustained on appeal 4 - Appeal withdrawn 5 - Conditional discharge 6 - Dismissed on appeal 7 - Absolute discharge 8 - Appeal of period Appeal Status Not Applicable
Conviction	Business Date	Business date.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Clause	Clause of the offence code under the corresponding legislation.	Free form string, maximum 2 characters 18

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Condition Record Date	The date when the condition is recorded.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Convicted for Drinking Offence under CCC (CODR)	Convicted for a drinking offence under the Criminal Code of Canada.	Flag: As of Date Convicted under CCC for Drinking Offence (CODR) As of Date Not Convicted under CCC for Drinking Offence
Conviction	Convicted under CCC (Non-drinking) (COOT)	Convicted under the Criminal Code of Canada (Non-drinking). This has not been applied since 1998.	Flag: As of Date Convicted under CCC (Non-drinking) (COOT) As of Date Not Convicted under CCC (Non-drinking)
Conviction	Conviction Appealed (APPL)	This flag indicates that at least one conviction on the driver's record is under appeal.	Flag: Conviction under Appeal (APPL) No Active Appeals
Conviction	Conviction Date	The date of a conviction.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Conviction Description	A description of a conviction.	Free form string, maximum 56 characters LITTERING HIGHWAYS CRIMINAL NEGLIGENCE CAUSING DEATH-STREET RACING-CCC
Conviction	Conviction Number (ID)	A unique identifier associated with a specific conviction.	Free form alphanumeric string 4015E8F2

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Conviction Offence Code	An offence code used to refer to act, section, subsection, paragraph and clause of the Highway Traffic Act or Criminal Code of Canada under which the driver has been convicted.	Formatted 16-character string Display as: Statute space Section space subsection space etc. HTA 12345 123 ABC 12
Conviction	Court Location Code	A code indicating the location of a courthouse in Ontario.	Free form 4-digit numeric 1007
Conviction	Demerit points	Number of demerit points assigned to a conviction.	Free form numeric (1 to 8) 4
Conviction	Driver's Licence Number	A unique 15 character identifier assigned to each driver in Ontario.	Free form 15-character alphanumeric X0915-26435-95718
Conviction	Drug Code	A driver is convicted of a Criminal Code of Canada offence for Impaired Driving involving drugs.	Flag: Drug Impaired Driving Not Applicable
Conviction	Excess Speed in KMPH	The difference between the vehicle speed and the road speed limit.	Free form numeric 50
Conviction	Ignition Interlock Applicable On Rein statement	Identifies if ignition interlock condition is applicable on reinstatement.	Flag: Yes No

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Ignition Interlock Condition	This condition is applied to a driving record based on specific conviction criteria.	Free form string I1 - 0.08 BAC, 1st time offence drinking and driving, 1 year Ignition Interlock IP - The driver meets the Conduct Review Stream A requirements - min 9 months Ignition Interlock I3 - 0.08 BAC, 2nd time offence drinking and driving, 3 years Ignition Interlock IS - The driver meets the Conduct Review Stream B requirements - min 12 months Ignition Interlock IA - 3 or more Administrative Suspensions, not Criminal Code Convictions - 6 months Ignition Interlock I6 - 0.08 BAC, 3rd time offender, 6 years Ignition Interlock IQ - The driver meets the Conduct Review Stream D requirements - min 18 months Ignition Interlock
Conviction	Ignition Interlock Condition End Date	The date when the ignition interlock condition ends.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Ignition Interlock Condition Start Date	The date when the ignition interlock condition starts.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Ignition Interlock Installation Date	Ignition interlock device installation date on which the device is installed.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Ignition Interlock Removal Date	Ignition interlock device removal date.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Ignition Interlock Category Code	Ignition interlock category code.	Free form string I3

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Number of Convictions Per Offence	Number of convictions per offence.	Free form numeric 3
Conviction	Offence Date	The date on which an offence occurred.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Paragraph	Paragraph of offence code under the corresponding legislation.	Free form string, maximum 3 characters AB
Conviction	Remedial Measures Assessment Date	A remedial measure program is required when a driver is convicted of specific offences related to impaired driving. There is an assessment date associated with the program.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Remedial Measures Assessment Result	A remedial measures assessment outcome.	DI - Driver Improvement ED - Education GT - Group Treatment IT - Individual Treatment OP - Out of province OT - Other
Conviction	Remedial Measures Course Completion Date	A remedial measure program is required when a driver is convicted of specific offences related to impaired driving or non-impaired driving offences. There is a course completion date associated with the program.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Remedial Measures Course Results	A remedial measures course results.	P - Passed F - Failed R - Reassessed Not Applicable

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Remedial Measures Course Start Date	A remedial measures course start date.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Remedial Measures Follow Up Type	Type of follow up.	Free form string PER TEL
Conviction	Remedial Measures Follow-up Date	A remedial Measures follow-up date.	Date (YYYY-MM-DD) 2020-03-14
Conviction	Remedial Measures Follow-up Results	Result of follow up.	Free form string F P
Conviction	Remedial Measures Type	A remedial measures type that a driver is subject to.	DD - Drinking and Driving DI - Driver Improvement DE - 2nd timer drug/alcohol-related administrative suspension DG - 3rd timer drug/alcohol-related administrative suspension
Conviction	Remedial Measures Assessment Type	A remedial measures program is required when a driver is convicted of specific offences related to impaired driving or non-impaired driving offences. There is an assessment type associated with the program.	DRS - Out of Province drivers INT - Interview with Driver Improvement Counsellor Not applicable PER - In person assessment TEL -Telephone assessment

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Remedial Measures Course Type	A remedial measures program is required when a driver is convicted of specific offences related to impaired driving, non-impaired offences or two or more administrative roadside sanctions. There is a course type associated with the program.	DE - 8-hour course DG - 16-hour course ED - Education GT - Group Treatment IT - Individual Treatment OT - Other
Conviction	Road Speed Limit in KMPH	Road speed limit in kilometres per hour.	Free form numeric 100
Conviction	Section	Section of the offence code under the corresponding legislation.	Free form numeric 12345
Conviction	Service Center	Center which services the device.	Free form string
Conviction	Service Provider Name	Name of the service provider who supplies the ignition interlock device and performs services.	Free form string
Conviction	Statute	Legislation under which the conviction offence falls under.	Free form string HTA
Conviction	Subsection	Subsection of offence code under the corresponding legislation.	Free form string, maximum 3 characters 123
Conviction	Vehicle Speed in KMPH	Vehicle's speed in kilometres per hour.	Free form numeric 150
Conviction	Violation Event Entry Time	Time of entry.	dd/mm/yyyy HH:MM:SS 08/12/2002 08:23:17

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Conviction	Violation Event Type	Types of violation events.	TAMPER (tampered with II device) REVOKE (driver no longer allowed to use the device) INSTALL (device installed in vehicle) UNINSTALL (device removed from vehicle) ENROLMENT (contract between the driver and the service provider) UNENROL (contract between the driver and service provider is cancelled) FINAL APPT (final appointment and device removed) FAILURE xx (various failures/events reportable to MTO e.g. 02, 04, etc.)
Demographic Information	Address Description	Client's address description.	Residential Mailing
Demographic Information	Address Validated	Indication that an address has been validated by a postal code.	Flag Yes No
Demographic Information	City	City.	Free form string TORONTO
Demographic Information	Client Role	Identifies if the client role is Driver, Registrant, Ontario Photo Card holder, etc.,	Driver Registrant OPC Carrier
Demographic Information	Client Type	The type of client represented in the record. One of three types - Individual, Corporation or Multi-Party.	Individual Corporation Multi-Party

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Demographic Information	Client-DL jurisdiction	Jurisdiction of a driver's licence (province or state).	2-digit alpha code
Demographic Information	Commercial Vehicle Operators Registration Number	A unique identifier issued to all commercial vehicle operators.	9-digit numeric 176979983
Demographic Information	Country	Client's address country.	Canada Non-Canada
Demographic Information	Current Address Effective Date	The business date an address change effectively takes place.	Date (YYYY-MM-DD) 2020-05-15
Demographic Information	Date of Birth	Date of birth of an individual client.	Date (YYYY-MM-DD) 1980-02-15
Demographic Information	Deceased	Indicates if an individual is deceased or reported dead (DEAD).	Flag: Reported Deceased Not Applicable
Demographic Information	Driver's Licence Number	A unique identifier assigned to each driver. In Ontario, this is a unique 15 character identifier.	15-character alphanumeric string X09152643595718
Demographic Information	First Name	First name.	Free form string JANE
Demographic Information	Formatted Province	Formatted description of a province code and description.	List: ON - Ontario
Demographic Information	FSA	Forward Sortation Area is the first three characters of a postal code.	Free form string M4P
Demographic Information	Gender	Drivers who wish not to self identify as male or female, and wish to remain gender neutral.	Gender Neutral Male Female
Demographic Information	Height in CM	The driver's height in centimeters.	Free form numeric 160

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Demographic Information	Language	The language a client would prefer to use when interacting and/or communicating with the ministry.	English French
Demographic Information	Last Name	The last name of an individual client.	Free form string SINGH
Demographic Information	Legal Name	The legal name of a corporation client as confirmed by Articles of Incorporation or registration documents.	Free form string 34095 Ontario Inc.
Demographic Information	Mailing City	City.	Free form string MISISSAUGA
Demographic Information	Mailing Country	Driver's mailing address country.	Canada Non-Canada
Demographic Information	Mailing FSA	Forward Sortation Area (FSA) - First three characters of a postal code	Free form string L6X
Demographic Information	Mailing Municipality	Municipality.	Look up table WOODBIDGE
Demographic Information	Mailing Postal Code/Zip Code	Driver's mailing address postal code.	Free form string L7A 4N9
Demographic Information	Mailing Province Indicator	Indicates if the address is in Ontario or not in Ontario.	Ontario Non-Ontario
Demographic Information	Mailing Street Address	Driver's mailing street address.	Free form string 55 EGLINTON STREET WEST
Demographic Information	Middle Name	The middle name of an individual client.	Free form string MARY
Demographic Information	Motor Vehicle Inspection Station Indication	Indication of whether a client has a Motor Vehicle Inspection Station.	Flag: Yes No

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Demographic Information	Multi Party Relationship 1	The linking of two or more client records (ie. a joint partnership). The joint relationship will have its own Registrant Identification Number.	Numeric 175921702
Demographic Information	Multi Party Relationship 2	The linking of two or more client records (ie. a joint partnership). The joint relationship will have its own Registrant Identification Number.	Numeric 175921702
Demographic Information	Multi-Party Name	The names of the clients in a multi-party relationship.	Free form string Jaspreet and Chris Trucking Inc.
Demographic Information	Municipality	Municipality.	Look up table BRAMPTON
Demographic Information	Name	Last Name, First Name, Middle Name.	Free form string DOE, JANE, CHRISTINE
Demographic Information	Old First Name	First name.	Free form string JAVIN
Demographic Information	Old Last Name	Last name.	Free form string JANUZ
Demographic Information	Old Middle Name	Middle name.	Free form string SALLY
Demographic Information	Ontario Photo Card (OPC) Person ID	A system generated unique ID for each driver and/or Ontario Photo Card (OPC) holder.	Free form numeric 101280766
Demographic Information	Operating As	Operating name or trade name of a client as confirmed by the Master Business Licence document.	Free form string JANE DOE

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Demographic Information	Postal Code/Zip Code	Client's postal code.	Free form string M4P 1G8
Demographic Information	Prepaid Amount	Amount in dollars a client has paid on their account in advance of incurring expenses.	Numeric 3500
Demographic Information	Province	Indicates if the address is in Ontario or not in Ontario.	Ontario Non-Ontario
Demographic Information	Registrant Identification Number (RIN)	A unique identifier for the registrant of a vehicle or plate.	9-digit numeric 654322354
Demographic Information	RIN Merge Status	Registration Identification Number (RIN) Merge Status.	Flag Y - Merged No Merge
Demographic Information	Sex	The gender of an individual.	M F
Demographic Information	Stored Credit	Refund balance in dollars owed to a client.	Numeric 150
Demographic Information	Street Address	Client's street address.	Free form string 55 EGLINTON STREET WEST
Driver Licence (DL) Transactions	Class Upgrade	This transaction involves processing of application for a driver upgrading to Class A, C, D or F in combination with or without Z endorsement, or for Z upgrade on its own.	
Driver Licence (DL) Transactions	Data Licensing Change	This transaction involves processing of applications for data changes such as name, date of birth, height, address or others.	

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Driver Licence (DL) Transactions	Driver Abstract	This transaction involves printing a certified or uncertified driver's abstract.	
Driver Licence (DL) Transactions	Driver Adjust	This transaction involves driver licensing adjustments.	
Driver Licence (DL) Transactions	Driver Renewal	This transaction involves renewals of driver's licence without any test requirements.	
Driver Licence (DL) Transactions	Licence Replace	This transaction involves the replacement of licences and photo exchanges.	
Driver Licence (DL) Transactions	Original Licence	This transaction involves processing of driver applications for G, G1, G2, M, M1, OR M2 class licence.	
Driver Licence (DL) Transactions	Out of Province (OOP) Exchange	This transaction involves processing of applications for Out of Province (OOP) exchanges for Class A, C, D, F or combination licences and Z endorsement for a driver who has never held an Ontario licence.	
Driver Licence (DL) Transactions	Photo Referral	This transaction involves the capture and storage of photo details.	

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Driver Licence (DL) Transactions	Print Application	This transaction involves the printing or reprinting of forms and applications when an original is lost, destroyed or unusable for any other reason.	
Driver Licence (DL) Transactions	Print TDIL	This transaction involves the printing of Temporary Driving Instructor's Licence (TDIL).	
Driver Licence (DL) Transactions	Record Documents	This transaction involves recording documents and articles received such as education certificates, vision reports, documents supporting previous experience, returned licence or others.	
Driver Licence (DL) Transactions	Record Fees	This transaction involves recording of fees and non-sufficient funds (NSF) payments as well as the selection and recording of fees for all knowledge test, exit tests and NSF payments.	
Driver Licence (DL) Transactions	Record Test Results	This transaction involves recording of knowledge, exit and road test results for all classes & Z endorsement.	

Category/Entity	Business Attribute Name	Business Definition	Data Type, Valid Values & Sample Values
Driver Licence (DL) Transactions	Special Handling	This transaction involves processing applications for driver transactions that cannot be processed online.	
Driver Licence Information	Active Demerit Points	Current total demerit points on a licence. Demerit points remain on the record for three years from the date of conviction. This total doesn't include points for convictions that are under appeal.	Free form numeric 3
Driver Licence Information	Active Flag (ACTF)	This flag is used by Ministry of Transportation when a conviction is under an appeal or a medical report requirement is inputted into the system.	Flag: Conviction under appeal or Medical File active Not Applicable
